

DIVERSE DELTA APPROACH

This map illustrates the relative location of delta smelt and salmon in the San Joaquin-Sacramento Rivers delta based on 2000 to 2006 survey results provided by the California Department of Fish and Game, California Department of Water Resources, East Bay Municipal Utility District, U.S. Fish and Wildlife Service, and UC Davis. The information presented in this map is not complete, and will be updated as data becomes available. The information was obtained from the California Department of Water Resources, Bay Delta and Tributaries Project. This map is intended for informational use only. The data is based on the best available information. The most recent and extensive information was used; however, that does not guarantee its accuracy. California Farm Bureau Federation will not be liable under any circumstances for any damages with respect to any claim by the user or any third party on account of or arising from the use of this map or data. This map was created by the California Farm Bureau Federation as a part of the Diverse Delta Approach. May 2007.
